Section 6. Areas for Improvement, Weaknesses, and/or Stipulations

Summarize EPP activities and the outcomes of those activities as they relate to correcting the areas cited in the last Accreditation Action/Decision Report.

Section 7. Accreditation Pathway

Continuous Improvement. *Summarize progress toward target level performance on the standard(s) selected.*

In our 2011 visit, the team remarked that the unit was meeting Standard 3 at the target level performance in several areas.

Candidates, graduates and school partners provided testimonials about their professional relationships with faculty. They indicated that faculty members set high standards, counseled them about how they could meet those standards, and were always available to students by phone, through email, or in person.

Candidates and graduates indicated that university supervisors and cooperating teachers worked together as seamless teams. They noted that the supervisors kept abreast of the issues that they were confronting during field-based experiences and then were prepared to offer pointed advice when they made classroom visits. Dozens of persons indicated that they considered these relationships to be a hallmark of the unit's programs.

A strength of the clinical practice element of the unit is the synergistic application of resources to meet the individual needs of candidates. Placements are carefully considered based on PASS-Port data, by the Director of Field Experiences. Teachers in the lab schools, which are geographically proximate, then provide counseling and advising to promote candidate growth in the experience, and university supervisors provide critical feedback on a regular basis. These same entities also engage in the annual review of program and unit data for purposed of improving the clinical program and proactively promote professional development useful for P-12 teachers and candidates.

P-12 faculty are actively involved in teaching methods courses in their specialty areas within the College of Education, adding to the authenticity of the course design, development and implementation within programs. They also supervise students in the clinical practice component of the program, providing another example of connectivity between university and P-12 settings.

Work continues within the EPP to maintain these areas of strength.
