Northwestern Mission. Northwestern State University is a responsive, student-oriented institution that is committed to the creation, dissemination, and acquisition of knowledge through teaching, research, and service. The University maintains as its highest priority excellence in teaching in graduate and undergraduate programs. Northwestern State University prepares its students to become productive members of society and promotes economic development and improvements in the quality of life of the citizens in its region.

The Student Experience Mission Statement. The Student Experience provides the University community with programs and services to support the academic mission of creating, disseminating, and acquiring knowledge through teaching, research and service while empowering a diverse student population to achieve their highest educational potential. The Student Experience creates a stimulating and inclusive educational environment that is conducive to holistic personal growth. The commitment to students initiates prior to entrance, sustains throughout the college experience, and continues beyond graduation. Enrollment Services provides equal access for education to potential students throughout the state and region and promotes economic stability and financial access to citizens. Student Affairs enhances student development and broadens intellectual, social, cultural, ethical, and occupational growth. The Student Experience works closely with faculty, staff, students, and the community to ensure graduates have the capability to promote economic development and improvements in the region.

Student Affairs Mission. The Division of Student Affairs prepares students to be productive members of society and to improve the quality of life of students. Student Affairs provides support services in career development and placement, advocacy and accountability, academic support, mental and physical health, disability accommodations, student activities and organizations, student union life, and opportunities in leadership, community service, and programs for new students. Through hands on involvement in programs and services, Student Affairs promotes personal development in a student-centered environment, which delivers innovative practices in an environment of respect. Student Affairs encourages integrity, diversity, and collaboration with all members of the university community

The Office of Student Activities and Organizations provides the University community with programs and services to support a positive collegiate experience. The mission and subsequent learning outcomes support our desire to transform and engage students through campus involvement. The Office of Student Activities at Northwestern State University aims to enhance the college experience of all students

Assessment Cycle 2019-2020

through student organizations, activities, traditions, and athletic events.

Methodology: The assessment process includes:

- (1) The assessment process for Student Activities and Organizations will be evaluated through multiple direct and indirect assessment tools.
- (2) The Director will analyze the data to determine whether the applicable outcomes are met and report to the Director of Student Affairs.
- (3) Results from the assessment will be discussed with the appropriate students and constituent groups.
- (4) Individual meetings will be held with students and constituent groups as required.
- (5) The Director of Student Affairs, in collaboration with the Student Activities and Organization Director, will determine proposed changes to measurable outcomes, assessment tools for the next assessment period and, where needed, service changes.

Student Activities and Organization Effectiveness

Service Outcomes:

SO 1. Build campus community by providing opportunities for students to learn and practice leadership and social responsibility.

Measure 1.1.

Promote and encourage active participation in campus and community life through student program planning and assessment. Program evaluation forms will be distributed to students and student leaders to evaluate effectiveness of programs and provide suggestions on future programming options. Evaluation procedures will yield evidence relative to program's success by the achievement of the program goals, responsiveness to expressed interest in our constituents, program attendance, and staff performance. Success is defined as 80% of the respondents responding satisfied or higher.

Finding. Target was met.

Analysis. In 2018-2019 the target was met. Based on the analysis and plan of action from the 2018-2019 results, the following changes were implemented in 2019-2020. The Director of Student Activities and Organizations would make improvements in programming efforts through student involvement and logistical planning and help increase survey submissions by appointing a supervisor to distribute surveys online.

Based on these changes, in 2019-2020 the target was also met. We found that

Assessment Cycle 2019-2020

participants as well as event programmers were satisfied or very satisfied with the effectiveness of the programs being offered. Program satisfaction ranked 98% very satisfied or satisfied compared to 91.3%% from the 2018-2019 academic year. Total submissions, however, decreased by 3 submissions (from 46 submissions for the 2018-2019 academic year to 43 submissions for the 2019-2020 academic year).

Decision, action, or recommendation. Based on the analysis of the 2019-2020 results, in AY 2020-2021, the Director of Student Activities and Organizations will make improvements in programming efforts and increase survey submissions. The analysis for 2020-2021 will also include a new goal of a 10% increase of submissions from the previous year.

SO 2. Provide opportunities for student leaders to develop program planning, organizational management, and interpersonal skills.

Measure 2.1.

Ensure student input is included in the planning and execution of programs and initiatives. Students are appointed to university committees by the Dean of Students, Student Government Association, and the University Programming Council formally known as the Student Activities Board, to allow student feedback regarding events, policies, and procedures at the university. An assessment of their experience will occur at the end of the appointments. Success will be defined as 50% of the 49 student appointments as well as 80% of the respondents responding agree or higher in terms of their voice and input.

Finding. Target was partially met.

Analysis. In 2018-2019 the target was not met. Based on the analysis and plan of action from the 2018-2019 results, the following changes were implemented in 2019-2020. We actively reached out to student committee members at the conclusion of each term to request survey submissions.

Based on these changes, in 2019-2020, the target was partially met. The Director of Student Activities continued to reach out to the student committee members requesting they submit the university committee membership survey. Seven students responded with 100% strongly agreeing their voice and input were appreciated which resulted in meeting the target goal. To help increase submissions (49 student committee members in total), the Director also requested that each committee chair reach out to their student committee members requesting they fill out the survey. However, only 14% (7 students) submitted the survey, resulting in this target only being partially met.

Decision, action, or recommendation. Based on the analysis of the results in the 2019-2020 academic year, in 2020-2021 the following action will be taken to continue making this a priority for the Office of Student Activities. We will actively communicate to student committee members at the conclusion of each term to request survey

Assessment Cycle 2019-2020

submissions, contact each committee chair to request submissions, and to promote the survey on all social media outreach each month of the term. Success will be defined as 50% of the 49 student appointments as well as 80% of the respondents responding agree or higher in terms of their voice and input.

Measure 2.2. Participation in trainings, retreats, workshops, and conferences are offered through a variety of experiences that develop organizational management competency. Students will attend retreats and trainings as well as regional and national conferences to learn from and share experiences with peers at other institutions. Students will have the opportunity to reflect on their experience after events through an Organizational Management Survey (OMS). The following outcomes will be assessed (14 outcomes): budget management, collaboration, communication skills, diversity and inclusion, event planning, leadership skills, networking skills, parliamentary procedures, safety and security, service learning, social awareness, social skills, time management, and values. Knowledge obtained at retreats and conferences will be measured by surveys distributed at the end of the experience. Success will be defined as 50% of outcomes represented within the total surveys submitted.

Findings: Target Met.

Analysis: In 2018-2019 the target was met. Based on the analysis and plan of action from the 2018-2019 results, the following changes were implemented in 2019-2020. The Office of Student Activities reached out to the groups that attended retreats, workshops, conferences, and requested that they have their participants fill out the OMS upon return of their trip or conclusion of the event and not at the end of the semester. To help increase the submissions of the survey we also requested that the Student Government Association distribute the OMS survey to all individuals who receive grant money from the Student Government Association ORF grant.

Based on these changes, in 2019-2020, there was additional outreach, to groups that attended workshops, retreats, conferences, and so forth, to capture data. The Office of Student Activities also hosted an RSO workshop in the fall to inform students about policies, procedures, and effective event processes and collect feedback to assist with the development of organizational management competency among student leaders. Through further analysis, the information provided in past years only indicated the most popular outcomes presented in the surveys. The Director of Student Activities reviewed all outcomes, not the most popular, to determine if there is a lack of knowledge gained through organization training, workshops, retreats, and so forth. There are 14 outcomes on the Organization Management Survey. Eleven of the fourteen were submitted for the 2019-2020 academic year.

Action - Decision or Recommendation: Based on the analysis of the results in the 2019-2020 academic year, in 2020-2021 we will reach out to the groups that attend yearly retreats, workshops, conferences, and so forth, requesting that they have their participants fill out the OMS upon return of their trip or conclusion of the

Assessment Cycle 2019-2020

event and not at the end of the semester. To help increase the submissions of the survey we will distribute the OMS survey to all individuals who receive grant money from the Student Government Association ORF grants and to individuals that sponsor an event by the Division of Student Affairs. This survey aids with program planning and evaluation, so it is imperative that these students reflect on their experiences at Northwestern State University, regionally, and/or Nationally.

Comprehensive Summary of Key evidence of improvement based on the analysis of results.

SO	Measure	Key Evidence
1	1.1	The Director of Student Activities and Organizations continued to make improvements in programming efforts and increased survey submissions.
2	2.1	The Director of Student Activities and Organizations actively communicated to student committee members at the conclusion of each term to request survey submissions, contact each committee chair to request submissions, and to promote the survey on all social media outreach each month of the term.
2	2.2	The Director of Student Activities and Organizations continued to reach out to the groups that attend yearly retreats, workshops, conferences, and so forth, requesting that they have their participants fill out the OMS upon return of their trip or conclusion of the event and not at the end of the semester.
2	2.2	The Director of Student Activities and Organizations distributed the OMS survey to all individuals who receive grant money from the Student Government Association ORF grant and events that are sponsored by the Division of Student Affairs and to individuals that sponsor an event by the Division of Student Affairs.

Plan of action moving forward.

We will work diligently to keep assessment as a key initiative within each area in Student Activities and Organizations through online submissions. The use of our new engagement platform, Presence (Purple Portal), will help capture this data more efficiently and accurately than our past efforts. The university committee structure and feedback process need to be an initiative from the division level to educate our students on the impact and importance of their feedback and participation. The Office of Student Activities will continue to host the RSO workshop each fall and will also host a session at the Spring Workshop hosted by the Student Government Association to inform students about policies, procedures, and effective event processes and collect feedback to assist with the development of organizational management competency among student leaders.
