

NORTHWESTERN STATE UNIVERSITY

COLLEGE OF NURSING

Master of Science in Nursing Program Goals

The Goals of Master of Science in Nursing Program are:

1. To prepare graduates with necessary knowledge, skills, and attitudes for advanced nursing practice as an educator, administrator, or nurse practitioner.
2. To prepare graduates to function and excel in various advanced nursing roles.
3. To prepare graduates to make significant contributions to the improvement of healthcare and to the advancement of nursing knowledge and practice.
4. To provide a foundation for doctoral study.

Master of Science in Nursing Program Objectives (Student Learning Outcomes)

The Master of Science in nursing graduate will be able to:

1. Integrate theories, knowledge, skills, and findings from nursing science, scientific disciplines, and humanities to guide the delivery of culturally sensitive care to clients, families and communities within the professional scope and standards of advanced nursing practice.
2. Demonstrate responsibility and accountability as a practitioner of advanced nursing and consumer advocate to affect relevant change that will improve the health of citizens at a local, state, and national level.
3. Utilize a scholarly inquiry process, grounded in evidence based research, to become a producer and consumer of research evidence which contributes to the development and improvement of nursing theory, nursing practice and ultimately client and healthcare outcomes.
4. Analyze the effect of historical, cultural, economic, ethical, legal and political influence on nursing and health care delivery.
5. Manage resources within a health care delivery system through collaboration with other health care providers, community, and clients.
6. Contribute to the continued professional development and improvement of self, client, community and healthcare delivery systems.
