

WORKFORCE DEVELOPMENT WORKSHOPS

▶ Statistical Quality Control

Friday & Saturday | October 2-3, 2026 | 8am to 5pm

Instructor: Nabin Sapkota, PhD

Professor of Industrial Engineering Technology at NSU.
MS in Industrial Engineering (Manufacturing Systems) and a PhD in Industrial Engineering with an emphasis on Industrial Simulation. Certified Lean Six Sigma Green Belt and completed MIT Professional Education's Applied Data Science Program: Leveraging AI for Effective Decision-Making.

Workshop Overview

This workshop focuses on quality principles, basic tools, and understanding process variation, introduces control charts and how to create and interpret them, and covers process capability and the application of these tools to real-world problems.

▶ Managing Projects: Structure That Still Flexes

Thursday & Friday | October 8-9, 2026 | 8am to 5pm

Instructor: Craig R. Caskey, MS PMP

Instructor & Lab Coordinator of Engineering Technology at NSU.
10+ years of manufacturing experience (quality, continuous improvement, project management).

Workshop Overview:

You already run kaizen events and PDCA cycles. This workshop applies that same thinking to project work: phase by phase, from initiating through closing. Over two days, you'll work through the planning tools, the control methods, and how to build check-and-adjust cycles into execution without losing the structure your organization depends on. Attend both days or join us on Day 2 if your process is already defined and you're looking for what to do inside it.
